

Greenlam — Washroom & Locker Collection

Edition One

Greenlam
LAMINATES

Driven for Excellence

As one of the world's principle laminate manufacturers, Greenlam brings a legacy of exceptional artistry, unsurpassed quality and unyielding passion for excellence. With a production capacity in excess of 24.5 million sheets per year, our passion is to ensure that superior quality products are accessible to you, wherever you may be across the globe. Innovative technology and creative solutions have been our guiding principles from our inception.

Professionals, like yourself; architects, interior designers and end consumers alike can depend on us to immerse your design and decor ideas with choice, elegance and character.

Our team of over 5,500 employees, network of over 23,000 channel partners to maintain a level of excellence and commitment focused on you.

Cores Values

No compromises on quality

Its all about the details – from the inception through to the creation, the processes and the flow. Throughout Greenlam’s entire manufacturing process, we apply the highest standards to ensure that the most exacting quality is attained, beginning with sourcing from suppliers who provide us with paper, which is either recycled or made from responsibly sourced* timber , to collaborating with printers behind exquisite designs.

The final result is a consistent product that is engineered to look as good as it performs.

We’re proud to share the meticulous craft, design and production that’s at the core of Greenlam laminates.

*Forest Stewardship Council and Programme for the Endorsement of Forest Certification

against manufacturing
defects built in to
all Greenlam laminates.

Anti-virus and Anti-bacterial Protection

Greenlam laminates are treated with high-efficacy, anti-microbial agents, retarding and eliminating up to 99.9% of commonly found bacteria and viruses, including SARS-CoV-2, which causes COVID-19.

Fire Retardant

Greenlam laminates have been tested to achieve optimal fire-propagation reduction and surface spread-of-flame performance. Proof of certification is available upon request.

NSF Certification

Greenlam laminates are manufactured according to the NSF^ food safety and environmental health standards, and can come in direct contact with food.

Anti-virus & Antibacterial Laminates

Sustainable Integrity

Environmental credentials

We are proud to exceed the industry benchmarks, relating to all areas of green certifications.

In particular, independent rigorous tests have shown that Greenlam laminates emit minimal levels of VOCs**, which have the potential to adversely impact the health of people that are exposed.

These are certified to be suitable for use in environments where children and vulnerable individuals may spend significant periods of time, such as schools, hospitals and clinics.

Greenlam provides FSC® Certified product , on request (certificate no. DNV-COC-002714)

**Volatile Organic Components

Responsible beauty

We believe creating beautiful spaces does not have to be at the expense of harming our planet. At Greenlam, we're committed to fight climate change. For us, this means taking accountability by putting environmentally conscious production, practices and packaging at the centre of our business model.

Zero liquid discharge

We carry out continuous research and modification in the production of amino resins and phenolic resins used in the paper impregnation process to safeguard against toxins leaving our plants.

Renewable energy utilisation

We procure various renewable energy resources, including bio-fuel and solar power, to be used in our laminate production.

Energy and water conservation

We embrace methods that promote environmental protection and renewal, such as our pressurised hot water system designed to scale back groundwater withdrawal, improving energy efficiency.

Responsible logistics

We use only fuel-efficient and low-gas emitting vehicles to reduce carbon dioxide emissions.

Optimal indoor air quality

Stringent air monitoring and periodic tests ensure that our internal work environment is at its best.

Responsible forestry

Our products are made from recycled or FSC* and PEFC** certified paper that come from sustainably managed forests, which contribute to combating climate change because of their capacity to remove carbon from the atmosphere and store it.

People- and environment-friendly products

Our laminate production is free of noxious asbestos, copper chromates, arsenate compounds, lead, any other heavy metals, urea, or urea-formaldehyde is used in our laminate production. Our products are also compliant with the global emission standards of VOC, formalin and other allied chemical constituents as part of our effort to maintain peak indoor air quality.

Synthetic and petrochemical ingredient reduction

Where possible, synthetic and petrochemical ingredients are substituted with naturally occurring components derived from nature to further lower VOC emissions and enhance our laminate handling quality.

Effective waste management

The real-time monitoring of our resources significantly reduces processing costs, waste production and disposal expenditure. Together with our waste- paper recycling endeavours, we save 8,000 fully-grown trees every year.

*FSC: Forest Stewardship Council

**PEFC: Programme for the Endorsement of Forest Certification

^VOCs: Volatile Organic Compounds

We're not just green

We're orange, white and proud.

Sustainability for us goes far beyond how we make our products. It's where we make, and who makes them.

Our Indian heritage and values are what define Greenlam, combining the best global machinery, design and our ethic makes us unique.

Our 4 state-of-the-art production facilities situated across India means we can share resource and best practice so we can provide unified global supply.

What's more, we're committed to sustainable development of our communities. Focusing on 4 key areas: Health, Education, Communities and Water.

As you can imagine, we pursue this with the same amount of passion that goes into our products. Which has resulted in Greenlam being recognised by international BRICS Business Council.
